Sumedang, Indonesia

Dedicated Informatics student (GPA: 3.29/4.00) with a strong interest in Software Engineering, Cyber Security, and Data Science. Proficient in full-stack web development, data structures, and secure network architectures utilizing modern technologies such as React, Python, C++ , and Go. Experienced in engineering end- to- end applications, including dynamic content management systems and interactive educational platforms. Recognized for technical excellence through the Google AI Professional Certificate, Google Network Security Specialization, and IDCamp scholarship. Passionate about applying academic knowledge and certified expertise to develop scalable, secure, and data-driven solutions

Relevant Experience

CCI UNITEL - Telkom University

Feb 2026 - Present

Study Group

- Developed and maintained interactive user interfaces for various web applications utilizing HTML, CSS, JavaScript, and React.
- Collaborated closely with cross-functional peers, including UI/UX designers and back-end developers, to ensure seamless system integration.
- Participated in technical workshops and contributed to collaborative software development projects within the student organization.

Cyber Physical System Laboratory - Telkom University

Nov 2025 - Dec 2025

Study Group

- Explored and implemented full-stack web development concepts, bridging interactive front-end interfaces with back-end database systems.
- Engineered functional web applications utilizing front-end technologies (HTML, CSS, JavaScript) and integrated them with server-side architectures.
- Collaborated within a laboratory environment to build data-driven solutions and optimize overall system workflows.

Mociman Helper - Sumedang

Jan 2026 - Present

Freelancer

- Authored and structured comprehensive academic materials, including research papers, essays, and journal summaries, ensuring high factual accuracy and strict adherence to client guidelines.
- Delivered customized creative designs and technical IT solutions, effectively translating abstract client concepts into visually appealing and functional final products.
- Managed end-to-end client operations, encompassing price negotiation, project timeline tracking, and requirement analysis, resulting in consistent on-time delivery and high client satisfaction.

Education Level

Universitas Telkom - Bandung, Indonesia

Aug 2024 - May 2028 (Expected)

Bachelor of Informatics student with a strong focus on Front-End Development, Web Technologies, and Software Engineering., 3.29/4.00

- Contributed as a Front-End Division Member at Central Computer Improvement (CCI).
- Completed the Study Group program at the Cyber Physical System (CPS) Laboratory, focusing on full-stack development.
- Selected participant in professional tech training programs, including IDCamp (AI Front-End Track) and Figma Camp.

Technical Projects

Voluntrip

Jun 2026 - Present

Full Stack Developer

- Engineered "Voluntrip", a comprehensive full-stack web application tailored for integrated travel planning and financial management.
- Integrated interactive map features for precise location tracking and dynamic route planning to enhance the user experience.
- Developed secure back-end logic to efficiently manage user budgets, calculate travel expenses, and generate automated itineraries.
- Designed a responsive front-end interface ensuring seamless cross-device compatibility and accessibility.

Management Kontrakan Pa Iman

Apr 2026 - Present

Full Stack Developer

- Developed a centralized full- stack management system designed to streamline tenant administration and financial tracking for a boarding house.
- Built interactive administrative dashboards providing real-time insights into room occupancy, available facilities, and monthly revenue.
- Designed robust database schemas to securely and accurately monitor user payments, invoices, and historical tenant records.
- Improved operational efficiency by structuring a seamless workflow for updating payment statuses and managing tenant data.

Portfolio Management

May 2026 - Present

Full Stack Developer

- Built a dynamic, full-stack portfolio Content Management System (CMS) to seamlessly manage and showcase professional experiences.
- Engineered a user-friendly admin panel that allows for instant content updates and experience additions without manual code modifications.
- Optimized front-end data rendering and back-end integration to ensure fast page load times and high performance.
- Applied modern UI/UX principles to create an accessible, highly responsive, and visually appealing layout across all screen sizes.

Learning Management System (LMS) Man 1 Sumedang

Feb 2026 - Jun 2026

Front-End Web Developer

- Engineered a responsive and intuitive front-end interface for the MAN 1 Sumedang Learning Management System (LMS).
- Implemented interactive UI components utilizing modern web technologies to enhance user accessibility and visual hierarchy.
- Streamlined the user journey to ensure seamless and intuitive navigation for both students and educators accessing learning materials.
- Conducted comprehensive cross-browser and layout testing to guarantee platform stability and visual consistency.

Skills, Achievements & Other Experience

- **Achievements** (2026): Google AI Professional Certificate – Google
- **Achievements** (2026): Google Network Security Specialization – Google
- **Achievements** (2026): AI Front-End Developer Track – IDCamp
- **Modules Taken** (2026): Cloud Architecture & Data Design – Dicoding Indonesia
- **Modules Taken** (2026): Technical Training – GCC x Telkom TUNC-2
- **Hard Skills**: Front-End Web Development: HTML, CSS, JavaScript, React.
- **Hard Skills**: Programming Languages: C++, Python, Java, Go.
- **Hard Skills**: Developer Tools: Git/GitHub, VS Code, Figma, Wireshark, MySQL Workbench.
- **Soft Skills** : Professional Skills: Team Collaboration, Time Management, Analytical Thinking, Technical Problem- Solving, Client Management.
